Which Aktiv boards are used in Aktiv sets? REV4

This list also allows you to see which Aktiv sets share board types

Important note – the part numbers must match exactly before you can consider using a board from a certain Aktiv set in a different Aktiv configuration:–

e.g you should **not** use PCAS 127AV in place of a PCAS 127KT
but.....

You can use a PCAS 119T board from a Tukan Aktiv Bass set in place of a Sekrit Aktiv Bass board as both sets use that same part number.
